Top Projects

- **E-Cars**

Developed a full-featured platform dedicated to the electric vehicle (EV) market in Egypt. The platform offers a wide range of services, including:

- **Vehicle Listings:** Users can browse and post listings for new, used, and imported electric cars.
- **Auctions:** Facilitated a dynamic auction system for selling electric vehicles.
- **Rental Services:** Available listings for electric vehicle rentals.
- **User Requests:** Users can request specific vehicles for purchase or rent.
- **Exclusive EV News:** Provided up-to-date news and insights on the electric vehicle market.
- **Charging Station Map:** Integrated a map of nearby EV charging stations.
- **Community Forums:** Created forums for user interaction and expert discussions.
- **Accessory Marketplace:** Created a marketplace for buying and selling electric vehicle accessories.
- **Service Centers:** Added a page for exploring service centers.
- **Showrooms:** Provided a page for browsing showrooms ads.
- **Installment and Insurance:** Partnered with companies for direct vehicle installment and insurance.
- **Chat System:** Added real-time chat for user communication with listing owners.

Technologies : React.js ,Node.js, Express.js, Socket.io and MongoDB

- **Meeting Management App**

Meeting management application, designed for the General Authority for Reconstruction and Agricultural Development Projects in Egypt, simplifies the meeting management process. Secretaries can add, schedule and organize appointments, while managers have a clear view of monthly schedules, upcoming meetings and the ability to edit meeting statuses. This streamlined application enhances organizational efficiency and promotes effective communication and workflow management.

Technologies : React.js ,Node.js, Express.js, Socket.io and MySQL
