High School Diploma In Computer Programming

Route Academy

2023-2024

Full Stack Web Development

Skills

Frontend	Backend	Extra	Personal
- React - JavaScript - Typescript - Next - Redux - Jquery - Bootstrap - SCSS - HTML5 - CSS3	- Node.js - Express.js - MongoDB - Nest.js - Socket.io - GraphQL - MySQL - ORM (Sequelize) - MVC - Docker	- Java - Java Swing - OOP - Oracle SQL - Oracle PL/SQL	- Problem Solving Skills - Self Learner - Team Work - Communication Skills - Work Under Pressure

Top Projects

- **Meeting Management App**

Meeting management application, designed for the General Authority for Reconstruction and Agricultural Development Projects in Egypt, simplifies the meeting management process. Secretaries can add, schedule and organize appointments, while managers have a clear view of monthly schedules, upcoming meetings and the ability to edit meeting statuses. This streamlined application enhances organizational efficiency and promotes effective communication and workflow management.

Technologies : React.js ,Node.js, Express.js, Socket.io and MySQL

More Details: <https://ali1kh.tech/projects/meeting-management>

- **Fresh Cart**

Fresh Cart is easy to use and navigate. Customers can simply browse the website and add items to their cart. Once they are finished shopping, they can check out and choose a delivery time. Fresh Cart will then deliver the groceries to their door.

Technologies : React.js

More Details : <https://ali1kh.tech/projects/fresh-cart>

- **Job Search App Backend**

Designed and implemented a robust Job Search App that empowers users to efficiently explore job opportunities, submit applications, and facilitates seamless job management. The app extends its functionality to companies, allowing them to post jobs and conveniently review incoming job applications.

Technologies : Node.js, Express.js and MongoDB

More Details : <https://ali1kh.tech/projects/job-search-app>

- **E-Commerce Backend**

Developed a solid foundation for an e-commerce platform by designing a reliable backend framework. This framework effectively manages functions crucial to e-commerce, including handling product listings, processing customer orders, and organizing product categories.

Technologies : Node.js, Express.js and MongoDB
